DO NOT CIRCULATE

25X1X

On 16 March 1951, not far from the hangars, four or five small construction sheds were seen for the first time at the Perleberg (M 54/T 70) airfield. On 19 March, two small coal-fueled locomotives and one dumpcar were seen moving near the construction sheds. Tractors towed rollers and other grading machinery on the landing field. About 30 tank trucks, possibly assigned to the army units stationed at the field, were parked on the southern edge of the field. \*

25X1A

\* [REDACTED] Comment. For layout sketch of airfield, see Annex. The arrival of construction material was observed on 13 March 1951.

Construction has apparently been started. According to reports by other sources covering the period between September and December 1950, the airfield was to be enlarged.
